ORCID Integration Use Case Documentation

1. **Use case name**

   orcid.cornell.edu

2. **Institution name**

   Cornell University Library

3. **Project goals and scope**

   This project seeks to encourage ORCID adoption at Cornell by offering a standalone, easily-remembered landing page for creation and confirmation of ORCID iDs by anyone with a Cornell Net ID. The target audience will be postdoctoral associates and graduate students unlikely to have access to Symplectic Elements through school or college-level support, and who may not have created VIVO profiles for themselves. With individual user permission, orcid.cornell.edu will also share confirmed ORCID iDs with Symplectic Elements, VIVO, and with central administrative units such as the Graduate School.

4. **Is your organization willing to serve as a resource for other organizations pursuing ORCID integration?**

   Yes

5. **Project personnel**

   Please include name, title, phone number, and email address for each contact:

   a. Principal investigator: Dean B. Krafft, Chief Technology Strategist and Director of IT, Cornell University Library; dean.krafft@cornell.edu; 607 255-9214

   b. Technical contact: Jim Blake, VIVO Release Manager, Mann Library; jeb228@cornell.edu; 607 255-3873

   c. Other team members:

      Kathy Chiang, Cornell VIVO Lead, Mann Library
      Jon Corson-Rikert, VIVO Development Lead and Head of ITS, Mann Library
      Deborah Schmidle, Cornell VIVO Content Coordinator, Mann Library
      Simeon Warner, Director of Repositories Group, CUL-IT and ORCID Board member
      Tim Worrall, UX Developer, Mann Library
6. **System(s) involved.** Provide a workflow diagram showing where ORCID identifiers were collected and the system(s) modified to collect and/or store ORCID identifiers.

7. **Project timeline**

   *The project began in March, 2014 and will conclude with deployment of orcid.cornell.edu in the summer of 2014.*

8. **Project web page(s)**

   *Instructions for creating and/or confirming an ORCID iD and pointers to additional information on the ORCID site will be part of the orcid.cornell.edu site itself.*

9. **Please identify the stakeholder groups within this project and describe the outreach/communications work your organization arranged in advance of implementation.**

   *This site will target researchers who do not have profiles in VIVO or personal bibliographic profiles in Symplectic Elements under the auspices of one of Cornell’s independent schools or colleges, many of whom are expected to be postdocs and graduate students. The Cornell community will be alerted to this new option through library liaison activities and the annual graduate student orientation event in September, supplemented by pointers on the Library website and in LibGuides.*

10. **Please provide an overview of your communications plan as well as examples of your communications outputs,** which may be adapted by other organizations for their integrations.

   *Presentation from May, 2014 ORCID Outreach meeting (to be posted on https://orcid.org/content/orcid-outreach-meeting-and-codefest-may-2014)*

   *Technical Documentation: [https://wiki.duraspace.org/x/mApVAw](https://wiki.duraspace.org/x/mApVAw) (in progress)*

11. **Are you willing to share your source code? If yes, please provide a link.**
The VIVO project on GitHub ([https://github.com/vivo-project](https://github.com/vivo-project)) incorporates ORCID integration changes on the current develop branch; a separate sub-project will be created for the Java libraries, HTML, and CSS files supporting orcid.cornell.edu.
